Company Overview

Kaizen Technologies Inc provides consulting and IT services to clients globally – as partners to conceptualize and realize technology driven business transformation initiatives. We provide solutions for a dynamic environment where business and technology strategies converge. Our approach focuses on new ways of business; combining IT innovation and adoption while also leveraging an organization's current IT assets. We work with large global corporations and new generation technology companies – to build new products or services and to implement prudent business and technology strategies in today's dynamic digital environment.

With Over 200 employees worldwide, we use a low-risk Global Delivery Model (GDM) to accelerate schedules with a high degree of time and cost predictability.

We help organizations operate more productively and profitably through a full spectrum of specialized staffing and project implementation products and services. We specialize in the areas of Engineering, Systems Integration/EAI, ERP Functionality Extension, Business/Data Warehousing, Sales Force Automation/ CRM, Middleware, Functionality Templates, and Custom Application Development for vertical markets including engineering/manufacturing, healthcare, pharmaceutical, telecommunications, financial services, insurance, etc. We deliver qualified consultants and project managers for both contract and ongoing requirements across all science and technology disciplines.

Off-Shore Development

When your business is running 24 x 7 to come up with innovative means to maximize its potential, outsourcing isn't just an option, it is a necessity. Today, efficient business process outsourcing has become the lever to unload your organization of resource-consuming procedures and controllable costs, leading towards allowing your organization a stronger focus on core business areas.

The GDC (Global Delivery Center) of Kaizen Technologies came about as a pro-active endeavor to channelize our experience to enhance client performance above and beyond labor cost arbitrage. Merging IT and GDC gives us the ability to 'leapfrog' the completion to deliver maximum value to our clients. With a vision to be a Top global technologies service provider by 2010, GDC is a central pillar for realizing this goal.

Staffing Services

Kaizen will help you build the right team, at the least cost, in the shortest possible time for all your projects and programs. We'll search our database for the skills you need, then we'll screen the best candidates and introduce the top people to you. Once we've built the team, we can also manage them for you. The only parameters we need to begin are your needs.

We begin with dedicated account managers and exceptional candidates, focus on our quality recruitment process and deliver outstanding results for our clients. We know that even when we fulfill a short-term need, the results have long-term impact.

Our goal is to ensure that every position that we fill or team that we build brings value to our clients' organizations. Therefore we consistently move from being one of many vendors to one of a few prime vendors. From project managers to application developers, we provide our clients access to a wide range of highly-qualified consultants.

We offer a unique combination of access, expertise and cost benefits through our offices in NJ, USA, R&D and Engineering Center in Bangalore and Manufacturing Facilities in Hyderabad, India. We also offer an array of solutions and services to numerous industries including:

- ➢ Aero-Space and Defense
- ➢ Automotive
- ➢ Bio-technology
- ➢ General Manufacturing
- ➢ Machine Tools
- ➢ Metallurgical – Forging, Casting, Sheetmetal, etc.,

Kaizen Technologies Inc, with its manufacturing facilities located at Hyderabad offers advanced manufacturing conforming to highest standards. Our facility in Hyderabad is accredited with ISO 9001 Certificate from IRQS and AS 9100B certification..

- ➢ Superior custom service
- ➢ Quick response and timely delivery
- ➢ Advanced manufacturing to meet the highest global quality standards
- ➢ Very competitive prices

Our Engineering Center Bangalore offers a ready pool of multi-disciplinary engineers – Mechanical, FEA Analysts, Tool and Die Designers, Software Professionals-with expertise in:

- ➢ Design Analysis
- ➢ DOE
- ➢ FEM
- ➢ Sensitivity Analysis
- ➢ Metal Processing Simulation and
- ➢ Manufacturing Simulation (design concepts, process concepts and material concepts).

Immaculate talent, excellent customer-focus and expertise in these areas allow us to meet any challenge in the areas of design analysis, process simulation, optimization and engineering. Our R&D group provides you with services to reduce the Design/R&D/Engineering/costs and the lead time.

IT Services

Our IT services stretch across the full application life cycle right from planning, design, development to implementation, roll out and maintenance. We provide maximum business value and deliver associated services as long term solutions to business challenges while fulfilling your business imperatives by employing the right people, processes and technology. We develop critical software components and business applications that provide seamless integration with legacy, contemporary and futuristic technologies.

- Custom Software Solution
- Outsourced Product Development
- Project/Product Transition and Support
- Independent Software Testing Solution
- Technology Review (Architecture & Database)
- Performance Testing
- Microsoft Dynamics Implementations
- Technology Practices
- Project Management
- IT Staffing/Consulting Services

Our focus on the various industry domains has helped us in evolving service methodologies to deliver the best of breed technology solutions to meet the ever changing needs of the industry. Our technical strategies are solutions that can be built and deployed on demand, in compressed time frames and predictable budgets using outsourcing models. This in turn helps our clients to stay at the forefront of innovation while achieving their performance goals.

Product Solutions

Business and IT environments are constantly changing with new end-user needs and enterprises requirements. Kaizen's suite of products is designed to help your organization better manage the existing IT environment and evolve strategically.

Kaizen's products are designed to help maximize the value of your existing investments through flexible integrations. Kaizen products are designed to function together as an application suite or as stand-alone products. By integrating Kaizen's product & service solutions, customers experience a range of payoffs.
Our range of Products include:

- ZenEagle
- HotSchool
- RapIT

ZenEagle

"**ZenEagle**" is one of the architecturally neutral software product for monitoring hetero-geneous application servers with web based dashboard. It is based on Java & Open-source tech-nologies and built on an extensible & scalable Archi-tecture, targeted at small, medium & large enterprises running clusters of servers and multiple java applications on them.
